WHAT'S INSIDE

Every folder has a **_preview.png** so you can see what is inside without opening every file.

01 **Emojis** — 128×128 PNG
83 emojis in 9 sets: bullets, sub-entries, dividers, arrows, numbers, responses, signs, status and icons.

02 **Role Icons** — 256×256 PNG
17 role icons for owner, staff, boosters, VIPs, members, bots and more.

03 **Server Icons** — PNG + 5 PSD
A to Z letter icons in 2 styles, plus 5 editable 2-letter logo templates.

04 **Headers** — PNG + 20 PSD
10 channel headers in Dark and Clean styles, blank templates and editable PSDs.

05 **Banners** — PNG + 10 PSD
5 designs as server banners and invite backgrounds, examples and editable PSDs.

06 **Server Blueprint** — PDF + TXT
A full community server: channels, roles, permissions and a setup checklist.

07 **Colors** — PDF + PNG
20 role colors, 10 gradients and Discord UI colors with copyable codes.

08 **Symbols & Spacers** — PDF
Separators, category styles, role symbols, dividers and invisible spacers.

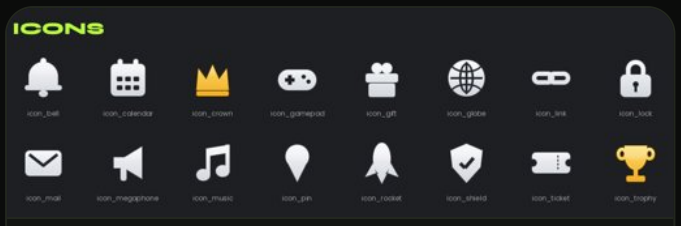

09 **Fonts** — PDF
15 best free fonts with previews, pairs and download links.

> **Same style everywhere.** Emojis, role icons, headers and banners are made to match, so mixing them keeps your server consistent.

QUICK SETUP GUIDE

Where everything goes in Discord. Menu names can change a little when Discord updates.

Upload emojis

Server Settings › Emoji › Upload Emoji. You can select many files at once. The file name becomes the emoji name.

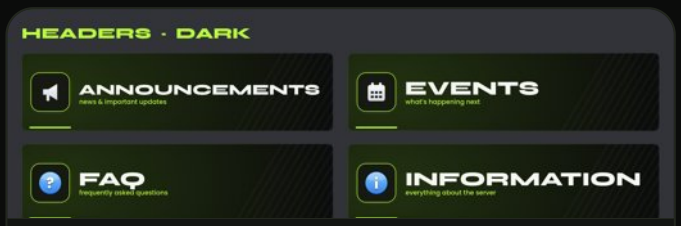

Add role icons

Server Settings › Roles › pick a role › Display › Role Icon › Upload Image.

Set the server icon

Server Settings › Server Profile (or Overview) › Icon › Change Icon. Use a file from 03 Server Icons.

Post headers

Drag a header PNG into a channel and send it above your text, or add it as the image of an embed with Discohook or your bot.

Banner & invite background

Server Settings › Server Profile. Server Banner uses the 960×540 files, Invite Background uses the 1920×1080 files.

Use the guides

Open the PDFs in 06 to 09 for the server structure, color codes, symbols and fonts. Everything on a light box in the Symbols guide can be copied.

Edit the PSDs
Install the fonts in “Fonts (install first)”, then open the PSD in Photoshop or Photopea (free). Steps are in HOW TO EDIT.pdf.

BOOST LEVELS

Some features need server boosts. This is what each level unlocks **at the time of writing**. Check Server Settings › Server Boost for the current list.

Feature	No boost	Level 1	Level 2	Level 3
Emoji slots	50	100	150	250
Invite background	–	✓	✓	✓
Animated server icon	–	✓	✓	✓
Server banner	–	–	✓	✓
Role icons	–	–	✓	✓

> **No boosts yet?** You can still use the emojis (50 slots), server icons, headers, the blueprint, colors, symbols and fonts.

TERMS OF USE

✓ You can

- Use everything in your own servers
- Use it in servers you build for clients
- Edit, recolor and combine the assets
- Show your server in videos and posts

✕ You can't

- Resell or share the files as they are
- Upload them to other asset packs or sites
- Claim the original files as your own work
- Use the fonts' files outside their own license
