FONT PAIRS THAT WORK

Use one bold font for the title and one clean font for the text under it. Never more than two fonts in one design.

Server Name
A short line of body text that sits under the title.
Syne + Poppins · modern

SERVER NAME
A short line of body text that sits under the title.
Bebas Neue + Montserrat · classic

Server Name
A short line of body text that sits under the title.
Unbounded + Outfit · bold & soft

Server Name
A short line of body text that sits under the title.
Russo One + Poppins · gaming

Server Name
A short line of body text that sits under the title.
Orbitron + Space Grotesk · sci-fi

Server Name
A short line of body text that sits under the title.
Anton + Montserrat · thumbnails

HOW TO INSTALL

01 Open the font's link and press **Get font**, then **Download all**.

02 Unzip the file. **Windows:** right-click the .ttf files and press **Install**. **Mac:** double-click and press **Install Font**.

03 Restart Photoshop, Photopea or Canva and the font shows up in the font list. In **Photopea** and **Canva** most of these fonts are already built in, so you can just search the name.

Syne and Poppins are already included in the PSD Templates folders, so the headers and banners work right away.
